OPERATIONS AND REPORTS (DIOR)
THE PENTAGON, WASHINGTON, D.C.

F O R E W O R D

This Department of Defense Report is published semiannually by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR).

The report contains summary data covering a wide range of aspects of the prime contract awards made during the reporting period.

It also contains historical data of value in providing the perspective required for analyses of defense procurement and projections of future defense procurement trends.

Section 1.

INTRODUCTION

PURPOSE AND SCOPE

This report presents a variety of current and historical data pertaining to Department of Defense Prime Contract Awards. Some data reflect fiscal years as early as 1951, providing a long-term perspective on defense procurement from that year forward.

Prime contract procurement data are given in six categories; a seventh category deals with the Defense Small Business Subcontract Program as it is implemented by prime contractors. The categories are:

Awards by Type of Contractor

Awards Publicized to Small Business

Awards by Procurement Program

Awards for Research, Development, Test and Evaluation

Awards by Method of Procurement

Awards by Type of Contract Pricing Provision

Defense Small Business Subcontract Program

In addition to the factors of prime interest in each of the seven categories, data are further redefined by indications of the portions ascribed

to the various defense departments and agencies, by year, by percentage of certain categories, and in other ways.

General coverage, exclusions, and definitions are given in this introduction. Specific notes peculiar to an individual table are given on the table itself.

TOTAL DoD PROCUREMENT, FISCAL YEAR 1981

DoD procurement awards during fiscal year 1981 totaled \$105,222,886 thousands as shown below:

<u>Category</u>	<u>Amount*</u>
Intragovernmental	\$ 9,798,208
For Work Outside U.S.	6,558,798
Educational and Nonprofit Institutions	1,671,352
All Business Firms for Work in U.S.	<u>87,194,528</u>
TOTAL	\$105,222,886

* in thousands of dollars

The categories listed above are defined below in Notes on Coverage.

NOTES ON COVERAGE

CIVIL FUNCTIONS. Civil functions encompass planning, programming, designing, constructing, and operating Federal water resource projects for navigation, flood control, hydroelectric power, water supply, recreation, and other purposes, as well as related activities.

INTRAGOVERNMENTAL PURCHASES. These are orders written by a Military Department or Defense Agency purchasing office requesting a nondefense Federal agency to furnish supplies or services from its stocks, in-house manufacturing facilities, or contracts to be executed by the other Federal agency.

Intragovernmental orders for fiscal year 1981 include foreign military sales contracts (reimbursable sales to foreign governments), in millions of dollars, as follows:

Army.....	\$3,064
Navy.....	1,357
Air Force.....	3,126
Defense Logistics Agency.....	44
	<hr/>
	\$7,591

WORK OUTSIDE THE UNITED STATES. This category refers to an award to a J.S. or foreign business, educational or nonprofit institution, or Government agency with a place of performance outside of the United States, its possessions, Puerto Rico, or the Trust Territories of the Pacific Islands.

EDUCATIONAL AND NONPROFIT INSTITUTIONS. This category comprises contract awards to any corporation, foundation, trust or institution operating on a not-for-profit basis. Included are educational and scientific institutions, hospitals of a nonprofit nature, and state, local, and other non-Federal government agencies.

If the work of these institutions meets the criteria of the category "Work Outside the United States" (see above), it is included in the data for that category.

BUSINESS FIRMS FOR WORK IN THE UNITED STATES.

Business firms are companies, individuals and partnerships organized for profit, including Small Business firms, defined below. The bulk of Department of Defense prime contracts are awarded to business firms for work done in the United States; "in the United States" is defined as being within the fifty (50) states and the District of Columbia, U.S. possessions, the Commonwealth of Puerto Rico, the Trust Territories, and other areas subject to the complete sovereignty of the U.S.

SMALL BUSINESS FIRMS. A Small Business firm is one as defined by the Small Business Administration in the Federal Register (Title 13, Chapter I, Part 121). The definition also is published in the Defense Acquisition Regulation (1-701). Generally, a small business concern is one that is independently owned and operated, is not dominant in its field of operations, and with its affiliates does not employ more than a specified number of employees (usually not more than 500, 750, or 1,000) depending on

the type of product called for by the contract. For construction and some service industries, the criterion is a specified annual dollar volume of sales or receipts, rather than the number of employees.

COVERAGE COMPARED WITH FISCAL REPORTS.

Amounts in this report are shown for the Department or Defense Agency that awards the prime contracts and not the department or agency that budgets for the supplies or services. In addition, data for Army, Navy, and Air Force include prime contracts awarded on behalf of the National Aeronautics and Space Administration and other Federal agencies, as well as for foreign countries whose defense purchases are made on a cash basis. Military Assistance Program (MAP) contracts for grant aid also are included in the awarding department's figures.

This report does not include obligations for "in-house" work performed at military-owned-and-operated establishments such as Navy shipyards, Army arsenals, and Air Force research laboratories, except to the extent that such establishments place contracts for supplies and services with industry or other Federal agencies.

Obligations for subsistence, clothing, petroleum, and various maintenance and operating supplies are neither included in the Procurement, Construction, and Research, Development, Test, and Evaluation categories of fiscal reports, nor shown separately in such reports.

Category definitions of the contract and fiscal reports are not comparable. For example, fiscal reports provide complete costs of end items, such as aircraft and missiles, whereas contract reports for these categories exclude separately procured electronics and weapons.

OTHER NOTES AND DEFINITIONS

CHAMPUS - All DoD totals in this publication include the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), and Other Defense Agencies (ODA).

DEFENSE LOGISTICS AGENCY - Defense Supply Agency (DSA) was established on January 1, 1962, to manage, procure, and distribute certain common supplies formerly the responsibility of the Army, Navy, and Air Force. The agency name changed on January 1, 1977 to Defense Logistics Agency (DLA).

LOCATION OF WORK - The place where the item is to be manufactured, assembled, or otherwise supplied by the prime contractor, the place where the service is to be performed, or the site of a construction project.

NET VALUE - The net amount of debit and credit procurement actions recorded during the period.

PRIME CONTRACT AWARD - A legally binding instrument executed by a Department or an Agency of the Department of Defense to obtain supplies, services, or construction. Indefinite-quantity, open-end or

call contracts are binding obligations. Indefinite quantity petroleum contracts are excepted from this definition in that the estimated dollar amount of such contracts is included in this report, and the orders written against the contracts are excluded.

PROCUREMENT ACTION - An action involving the obligation or deobligation of funds which officially awards or changes a prime contract. This may be the award of a new prime contract, a debit or credit change to an existing prime contract, or an order written against an indefinite-quantity, open-end, or term prime contract. Changes may be amendments, job orders, task orders, work orders, supplemental agreements, engineering changes, cancellations, or terminations.

SUBCONTRACT PAYMENT - A cash payment made by one contractor to another for supplies, services or construction required to fulfill a prime contract.

SUBCONTRACT COMMITMENT - A legal instrument drawn up between contractors establishing the value of goods and services required to fulfill a prime contract.

UNITED STATES - The fifty (50) states and the District of Columbia, U.S. possessions, the Commonwealth of Puerto Rico, the Trust Territories and other areas subject to the complete sovereignty of the United States.

NOTES ON PERCENTAGES - Percentages given in tables in this report may not add due to rounding.

B. INCLUDES OTHER DEFENSE AGENCY AWARDS AND CONTRACTS REFERRED IN THIS TABLE.

Section 2.

AWARDS BY TYPE OF CONTRACTOR

DOD PROCUREMENT BY TYPE OF CONTRACTOR

DOD procurement awards during fiscal year 1981 totaled \$105,223 million. This was an increase of \$21,537 million (25.7 percent) over the \$83,686 million awarded during fiscal year 1980. Contract awards to U.S. business firms for work done in the U.S. increased by \$20,491 million. Awards for work outside the U.S. increased by \$1,192 million; awards to educational and nonprofit institutions increased by \$215 million; and awards to or through other government agencies decreased by \$362 million. See Tables 1 and 2 and Chart I.

TRENDS IN PROCUREMENT

Fiscal year 1967 procurement reached a total of \$44.6 billion, the highest level since the peak Korean Conflict of fiscal year 1952, when procurement totaled \$43.6 billion. Following Korea, the cutbacks and adjustments reduced net procurement to \$13.3 billion in fiscal year 1954, after which there was a steady increase to \$25.3 billion in fiscal year 1959. After declining to \$23.7 billion in fiscal year 1960, procurement again increased in each of the next three fiscal years, reaching \$29.4 billion in fiscal year 1963.

Following declines to \$28.8 billion in fiscal year 1964 and \$28.0 billion in fiscal year 1965, the increase in military activity in Southeast Asia brought about a sharp increase, reaching \$38.2 billion in fiscal year 1966 and a high of \$44.6 billion in fiscal year 1967. Following declines

in the next four years to \$34.5 billion in fiscal year 1971, procurement increased in fiscal year 1972 to \$38.3 billion, declined to \$36.9 billion during fiscal year 1973, and has increased steadily from \$40.1 billion during fiscal year 1974 to \$105.2 billion during fiscal year 1981. The long-term trend in procurement to business firms is shown in Table 3 and Chart II.

SMALL BUSINESS PERFORMANCE

Small business firms received \$17,770 million during fiscal year 1981, an increase of \$4,182 million over the \$13,588 million for fiscal year 1980. While the amount of money received by small business firms did increase substantially, the percentage of military prime contracts awarded to small business firms (when compared to all business firms) remained at 20.4 percent, the same as last fiscal year.

As shown in Chart I, 7,712,030 contract actions or 70.5 percent of the total 10,941,213 actions placed with business firms, were awarded to small business firms.

Section 3.

AWARDS PUBLICIZED TO SMALL BUSINESS

The extent to which the small business community was notified of pending procurement actions, and its success in competing for the publicized procurement are shown in Table 4, Awards Publicized to Small Businesses.

The types of procurement included in the category "Awards Publicized to Small Business" are: (1) proposed procurements which are synopsized and listed in the Department of Commerce publication Commerce Business Daily; (2) modifications to contracts which were synopsized; (3) formally advertised procurements which were not published in the Commerce Business Daily; and (4) all other procurements on which small firms were specifically requested to submit proposals.

For the most part, procurements which are not publicized relate to classified work, goods or ser-

vices involving an unusual or compelling emergency, modifications of contracts which were not synopsized, and delivery orders under unsynopsized contracts.

During fiscal year 1981, 84.7 percent of the total awards to business firms were publicized to small business, compared with 84.8 percent during fiscal year 1980. Small business did not submit bids on 66.7 percent of these publicized procurements, compared with 69.3 percent the previous fiscal year. They were successful in bidding on 24.1 percent (24.0 percent last year) of the publicized total, and were unsuccessful bidders on 9.2 percent (6.6 percent last year).

The portion of procurement synopsized during fiscal year 1981 amounted to 76.3 percent of the total procurements, as compared to 76.1 percent for fiscal year 1980.

Section 4.

AWARDS BY PROCUREMENT PROGRAM

Data on the net value of prime contract awards to business firms in the United States by procurement program are shown in Table 5, Awards by Procurement Program, and Chart III for fiscal years 1980 and 1981, and in Table 6, Awards by Procurement Programs for fiscal years 1955 to 1981. Table 6a further subdivides awards by procurement program by purchasing department for fiscal years 1963 through 1981. The procurement program definitions are identical with those prescribed for use in the Defense Materials System.

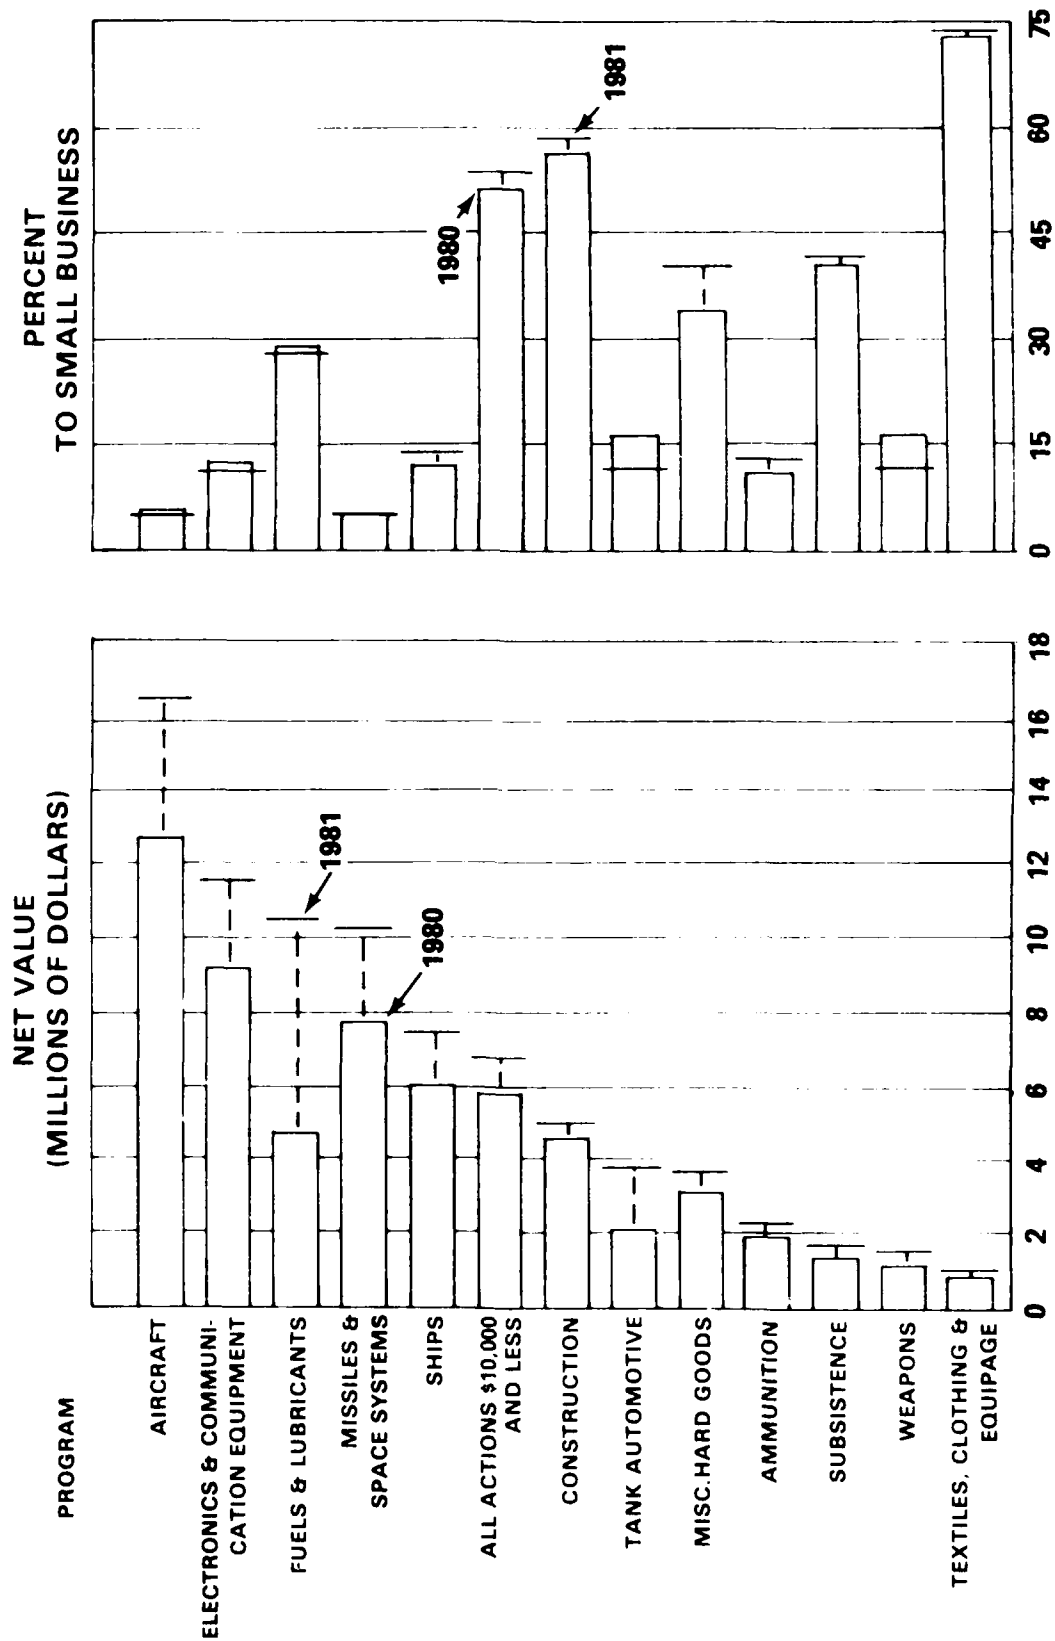

Total DoD procurement from United States business firms for work performed in the United States

during fiscal year 1981, totaled \$87,195 million, \$20,491 million (30.7 percent) higher than the previous fiscal year. A comparison of fiscal years 1980 and 1981 shows an increase in all major categories, except services which decreased slightly. The procurement programs with the largest increases were petroleum, \$5,746 million; airframes and related assemblies and spares, \$2,355 million; missile and space systems, \$2,342 million; electronics and communication equipment, \$2,155 million; ships, \$1,438 million; combat vehicles, \$1,342 million; and aircraft engines and related spares, \$1,181 million.

Section 5

5-1. RDI&E PROGRAM, DEVELOPMENT, RESEARCH, AND TEST

The total dollar value of RDI&E awards, including test, and development work, for the period 1941-1970 is shown in Table 5. The total dollar value of RDI&E awards for the period 1941-1970 is shown in Table 5.

The total dollar value of RDI&E awards, including awards for work outside the Armed Forces and orders to other government agencies, amounted to \$10,412 million during fiscal year 1941 and \$104,412 million during fiscal year 1970. During this same period last year, the dollar amount was \$9,014 million, which was 11.7 percent of the total awards.

Between fiscal years 1959 and 1963, there was an annual increase in the dollar value of awards for RDI&E work. Following two years of decline, awards for RDI&E procurement increased each year and reached \$6,436 million in fiscal year 1968. After two years of decline to \$5,399 million in fiscal year 1970, awards for RDI&E increased in

total procurement year 1970, which was 11.7 percent of the total awards for the period 1941-1970. The total dollar value of RDI&E awards for the period 1941-1970 is shown in Table 5. The total dollar value of RDI&E awards for the period 1941-1970 is shown in Table 5.

Although there has been a general upward trend in both total and RDI&E awards since fiscal year 1941, the relative share of RDI&E procurement in total procurement has declined from 11.7 percent in FY 1976 to 11.7 percent in FY 1970.

Contract awards for RDI&E by procurement program are shown for fiscal years 1959 through 1970 in Table 5. The table shows the percentage of RDI&E awards in each program based on the total shown in Table 5 at Section 4.

Section 6.

AWARDS BY METHOD OF PROCUREMENT

COMPETITION IN DoD PROCUREMENT

Prime contracts awarded after solicitation and receipt of two or more responsive offers for competitive price, design, or technical proposals totaled \$35,915 million and represented 40.7 percent of the net amount of procurement (excluding intra-governmental orders and other exclusions) during fiscal year 1981, compared to \$25,134 million and 36.0 percent for last year. Competitive methods accounted for 48.1 percent of the total number of procurement transactions during this year, while these competitive transactions accounted for 39.7 percent of the total last year. Table 9 gives the total for both competitive and noncompetitive awards for fiscal years 1980 and 1981. Chart IV shows these factors graphically.

Approximately 40 percent of the value of awards during fiscal year 1981 involving solicitation of one procurement source was for supplemental or follow-on contracts placed with companies which had previously competed successfully for the price, design, or technical phase of a project or weapon system. The remaining one-source solicitations included such types of goods and services as utilities, patented or other proprietary items, experimental, developmental, test or research work, and industrial mobilization in the interest of national defense. Table 10 provides a general indication of the type of items for which only one source was solicited, and further demonstrates that substantial use of competitive procedures is made even

when sealed-bid (formally advertised) methods are not employed.

FORMALLY ADVERTISED AND OTHER AWARDS

Table 11 shows the dollar volume of procurement placed with small business and other contractors through unrestricted formal advertising and other statutory authority during fiscal years 1980 and 1981 and Table 12 shows similar information for fiscal years 1951 through 1981. During this year, 7.3 percent of total procurement was obtained by unrestricted formal advertising methods, compared to 7.6 percent in the preceding year.

In discussions relating to "Competition" and "Formally Advertised and Other Awards," it should be noted that sealed-bid procedures are used not only for unrestricted formal advertising, but also for procurements made under balance-of-payments restricted advertising (restricted to U.S. end products and services) and small business restricted advertising (restricted to small business firms). These procurements are conducted in the same manner as prescribed for formal advertising; however, they are classified as negotiated procurements.

If small business restricted advertising and balance of payments restricted advertising are included in the total of advertised awards, the dollar value and percentages for fiscal year 1981 are as follows:

	FY 1981	
	Amount*	%
Total Procurement Except Intragovernmental and FMS	\$95,425	100.0
All Advertising	11,272	11.8
Unrestricted Formal Advertising	6,977	7.3
Small Business Restricted Advertising	4,044	4.2
Balance of Payments Restricted Advertising	251	0.3

STATUTORY AUTHORITY

Tables 13, 14, and 15 present data on the detailed types of procurement authority specified in Title 10, Section 2304 (a) of the United States Code. The five clauses used most extensively to negotiate contracts during fiscal year 1981 were (10) "Impractical to Secure Competition by Formal Advertising;" (14) "Technical or Specialized Supplies Requiring Substantial Initial Investment or Extended Period of Preparation for Manufacture;" (11) "Experimental, Developmental, Test, or Research;" (1) "National Emergency;" and (6) "Purchases Outside U.S."

Small business and labor surplus set-asides totaled \$8,464 million representing 8.9 percent of the total. This exceeds the \$4,936 million and 6.7 percent of total in the previous year.

Table 14 shows a total of 12,745,953 procurement actions during fiscal year 1981, an increase of 674,148 in the total number from last year. Of

this year's total, 97.1 percent, or 12,380,331 were for \$10,000 or less. Last year, actions of \$10,000 or less numbered 11,746,636 accounting for 97.3 percent of all actions.

Of the 365,622 larger actions over \$10,000 in the current year, 39,264 were for intragovernmental awards. Of the remaining 326,358 actions, 44.5 percent were for new contracts or supplemental awards for additional supplies or services, while the remainder were delivery orders or modifications such as price redeterminations or incremental funding actions which were pursuant to the terms of existing contracts. Five negotiation clauses accounted for 74.4 percent of the total number of negotiated contract actions over \$10,000: (10) "Impractical to Secure Competition by Formal Advertising," 37.8 percent; (1) "National Emergency," 15.8 percent; (9) "Perishable or Non-Perishable Subsistence," 10.0 percent; (6) "Purchases Outside U.S.," 5.7 percent and (11) "Experimental, Developmental, Test, and Research," 5.1 percent.

* Millions of dollars.

Section 7.

AWARDS BY TYPE OF CONTRACT PRICING PROVISION

Tables 16 and 17 show the types of contract pricing clauses used in procurement actions over \$10,000. As shown in these tables and Chart V, during fiscal year 1981, awards over \$10,000 (excluding intragovernmental) totaled \$88,363 million, of which \$68,618 million, or 77.7 percent was awarded under fixed-price procedures, and \$18,930 million, or 21.4 percent, under cost reimbursement procedures. Other types (time and materials and labor hours) accounted for \$815 million, or 0.9 percent of total.

Cost-plus-fixed fee (CPFF) contracts accounted for 9.0 percent of total contract awards over \$10,000. Fiscal year 1981 shows the lowest CPFF awards since fiscal year 1964 when the total was 9.4 percent. The use of incentive contracts (both fixed and cost-types combined) increased from 20.3

percent of total contract dollars in the preceding year to 20.9 percent this year. The use of firm fixed-price contracts increased from 46.1 percent to 47.6 percent.

The total of 326,358 actions over \$10,000 during this period, shown in Table 16, is divided into 145,381 original contract actions and modifications calling for additional work, and 180,977 actions representing delivery orders and modifications made pursuant to the terms of existing contracts. The overall number of procurement actions over \$10,000 increased during the current period by 12.6 percent compared with the previous year. Actions for new work increased by 11.7 percent, and actions representing delivery orders and modifications pursuant to the terms of the original contract increased by 13.4 percent.

(c) Includes Time and Materials and Labor Hour contracts.

Section 8.

DEFENSE SMALL BUSINESS SUBCONTRACTING PROGRAM

Commitments for subcontract work by 1,133 reporting large contractors totaled \$33,937 million in fiscal year 1981, which was a 33.0 percent increase from the \$25,499 million reported by 1,023 large contractors in fiscal year 1980.

Small business firms received 38.3 percent of the total committed for subcontract work during fiscal year 1981 compared with 42.4 percent for fiscal year 1980. Comparative data for fiscal years 1972 through 1981 are shown in Table 18.
